The main function of NMT is getting information online, browsing and restoring information off line, for the users living in isolated places with lack of internet environment. Utilized Web Service, XML data transmission, threading, asynchronous and Design Pattern in FC's technology.

## **Computer Science & Technical Skills**

---

Development & Version control Tools:

Visual Studio, Eclipse, VSS,SVN

Languages:

C# 5 years

C++ 3 years

Java 3 years

HTML, CSS, SQL JavaScript JQuery

Databases:

MySQL, Microsoft SQL server, Access

Technologies:

Java Android, J2EE

.NET, MVC, WPF, Windows Form Application, Design Pattern ,OOP,

Experiencing Technologies and knowledge:

Angular, Ionic,Node.js,BlockChain

### **Certificates**

---

National Computer Rank Examination NCRE Level 2,3

Microsoft Certified Professional MCP

Public English Test System PETS Level 3

TOEFL

### **Education**

---

**B.S. Computer Information Management** Beijing Economic and Technological College
